

PRODUCT DATA SHEET

Ronabond CRM 40

Pre-bagged Class 40 Polymer Modified Concrete Repair Mortar

DESCRIPTION

Ronabond® CRM 40 is pre-bagged Class 40 polymer modified concrete repair mortar. It is specially designed for general repairs to both structural and non-structural concrete. The polymer additive in the Ronabond® CRM 40 mortar enhances the corrosion protection performance on the steel reinforcement.

USES

- Repair spalling concrete
- Repair honeycomb concrete
- Corrosion protection of steel reinforcement
- Structural and non-structural concrete repair
- High performance external wall plastering

CHARACTERISTICS / ADVANTAGES

- Pre-bagged for quality assurance
- Single pack requiring only the addition of water
- Simple to mix and apply
- Suitable to apply for both vertical and overhead position
- Non-sag and easy to achieve smooth finishes

PRODUCT INFORMATION

Packaging	25 kg bag		
Shelf life	9 months from the date of production		
Storage conditions	Stored properly in undamaged and unopened original sealed packaging in dry conditions. Protect from direct sunlight and frost.		
Product declaration	Test Description	Age at Test	Ronabond® CRM 40 Typical Performance
	Compressive Strength	28 days	30-60 MPa
	Tensile Strength	7 days	≥ 2.0 MPa
	Elastic Modulus	28 days	15-25 KN/mm ²
	Bond Strength	7 days	≥ 2.0 MPa
	Coutinho Ring	1-28 days	No cracks
	Figg Air Permeability	35 days	≥ 200 seconds

APPLICATION INFORMATION

Consumption	Approx. 58 bags/m ³
--------------------	--------------------------------

APPLICATION INSTRUCTIONS

SUBSTRATE QUALITY / PRE-TREATMENT

For use as concrete repair

Surface Preparation

- All defective concrete should be removed to leave a sound substrate
- Loose rust and scale should be removed from exposed reinforcement
- Cut around the perimeter of the repair area to a minimum depth of 6 mm to avoid feather edges

Surface Priming

- Concrete surfaces to be primed must first be thoroughly wetted with clean water
- Mix the primer by the following ratio :
Ronafix® : Cement = 1:1.5 by volume OR 1:2.0 by weight
- Prime the steel reinforcement and allow to become tacky
- Prime the steel reinforcement again and the previously dampened concrete surfaces

MIXING

Mix the whole bag of Ronabond® CRM 40 with 4.25 litres clean water approximately to even consistency with the aid of a mechanical mixer.

APPLICATION

- Apply the well mixed Ronabond® CRM 40 mortar to the prepared and primed substrate before the primer coat dries
- Application thickness should be between 6–40 mm per layer
- Intermediate layers should be scratched or keyed and primed before the next layer is applied
- Finish the repair to the desired profile using steel trowel or wood float
- Allow the repair area to cure properly and consult with Sika technical department for curing method in severe conditions
- Minimum cover to reinforcement should be 10 mm

CLEANING OF EQUIPMENT

Clean all tools and application equipment with clean water immediately after use.

BASIS OF PRODUCT DATA

All technical data stated in this Product Data Sheet are based on laboratory tests. Actual measured data may vary due to circumstances beyond our control.
